Ingrahams in Camp on the Banks of the Margaree River

Following is a very interesting letter received by Mr. T. S. Board from Mr. A. L. Ingraham, in which he describes his trip from Arrowwood to Nova Scotia:

Margaree, June 3, 1932

Mr. T. S. Board

Arrowwood.

Dear Friend:

We arrived here June 1st and had a very good trip, which took fifteen days. I would like to describe this wonderful trip in detail but it would be too lengthy. However we had a good time and are now camped in a three-roomed cottage among the trees on the banks of the Margaree River.

On Monday I am going fishing and for the rest of the month I shall wander among the lovely trees and streams. The mountain sides are not in full bloom yet but will be in a few days.

It is a pleasure to meet so many of the old folks, many of them from eighty to eighty-seven years and still going strong.

We came by way of the Soo to North Bay and down through Ottawa. While there we visited the grand old parliament buildings. Continuing our journey we came on down through Montreal, Quebec and Fredericton to Nova Scotia. It was a wonderful trip. The cost of the trip was \$101.65, that included all our expenses.

Some of the best daily drives were 333, 317 and 311 miles. The shortest run was 150 miles and the total distance travelled was 3,662 miles. On the trip we had six punctures, bought two inner tubes, stopped in three hotels and had no accidents.

Next Sunday I will attend the church I built here twenty-five years ago and the building still looks good. I saw a number of buildings going up, especially through Nova Scotia. The people here don't know as much about hard times as we do in the west.

Well, I must close. Best regards to you and your family,
A. L. INGRAHAM.

There were 2,742 business failures in Canada in 1931, with total liabilities of \$46,215,000.

The greatest fault is to be conscious of none.

Annual Convention of U.F.W.A. to be Held June 24th

The annual convention of the U.F.W.A. of the Bow River constituency will be held in the Church of the Brethren, Arrowwood, on Friday, June 24th.

The convention opens at 10 a.m. with a musical program. A noon-day lunch will be served in the basement.

At the afternoon session Mrs. Warr (of Wetaskiwin, president of the U.F.W.A. for Alberta), Mrs. Buckley from Gleichen, and other speakers will be present and give addresses.

All ladies are cordially invited.

Arrowwood's Sixth Annual Celebration Was a Success

The Sixth Annual Sports Celebration and baseball tournament in Arrowwood turned out to be a real success Saturday last when the weatherman provided ideal weather. The children's sports in the morning were carried through with considerable enthusiasm in each event and amongst the winners, Chester Beagle and Clarence Royer were conspicuous.

At 1 o'clock Arrowwood and Queenstown took the diamond for the first ball game of the day. Arrowwood scored in the first inning when Smith was safe at home. Queenstown were held scoreless until the fifth inning when timely hits and costly errors gave the visitors four runs. Fred Miller pitching for Arrowwood was steady at all times, and Rubbelke of Queenstown was master of his famed slow-ball. The score by innings was,

Arrowwood 1 1 0 0 1 0 0-3

Queenstown 0 0 0 0 4 0 0-4

Commencing at 3 o'clock the teams from Carseland and Gleichen provided the entertainment. This developed into a duel for the first five innings when Carseland touched Blair of Gleichen for 4 runs. Scott of Carseland had plenty of curve and his control was excellent so that he easily coasted through to a 7-1 victory. Max Phillips of Carseland hit for a circuit clout in the seventh inning with a beautiful drive to right field.

Gleichen 0 0 0 0 0 0 1-1

Carseland 0 1 0 0 1 4 1-7

In the twilight fixture Queenstown and Carseland opposed each other with Queenstown at bat in the first half. Ainsley in the box for Carseland was in difficulty and Queenstown accepted his offerings for 9 runs before the side was finally retired. Soli worked well for Queenstown and Carseland were unable to score in their half. In the second inning Queenstown collected 7 more runs to give them a sufficient lead to win the game. Carseland were far below form and errors contributed greatly to the final score of 25-7 in favor of Queenstown. Elmer Thompson finished in the box for Queenstown while Scott finished for Carseland. Score by innings,

Queenstown 9 7 0 1 0 1 2 4 1

Carseland 0 0 2 0 1 0 2 0 2

One of the main events of the day was the basketball game between Arrowwood Aces and the Blackie High School.

The Aces did not come up to their regular form, due, we presume to the absence of their captain, Miss Carol Chrestenson who was injured in the game with Blackie at Blackie. The Regular Aces team was supplemented by three of the High School's foremost players, Edna Beagle, Mildred Kauffman and Jean McLeod. Some very spectacular shots were made by Dorothy and Mildred Vancil.

The softball game in the afternoon between the Arrowwood girls and the Cluny Club was a

To Amalgamate Municipalities Into 40 Districts

Premier Brownlee Announces
Proposed New Plan of
Amalgamation

Edmonton, June 22.—Abolition of the present system of small municipal districts in the Province and the creation in its place of a system of "enlarged municipal areas," under which the 166 municipal districts now in operation, together with some 143 improvement districts now administered by the provincial government, would be amalgamated into some 40 "enlarged" areas, thereby eliminating a large part of the cost of government both provincial and municipal, while increasing efficiency of administration is proposed in a plan announced this week by Premier Brownlee. A saving in municipal administrative costs alone of over a quarter million dollars or three-quarters of a mill on the total rural assessment in the province is estimated, while the saving in provincial administrative costs and in the costs of all public services will run into very large figures.

The proposal, which has already been before the provincial cabinet, and is now presented to the public by the Premier, is the result of two years of rather exhaustive study and survey of the province, conducted by an official of the Dept. of Municipal Affairs. The plan is entirely different from any scheme of large municipal organization in existence in Canada or the U.S., and is simply the application of the principles of our present small municipal unit to the larger area of only one authority for municipal administrative and taxing purposes.

The plan as so far developed will, in accordance with a resolution of the last convention of the municipal districts association, be discussed further with the executive of that organization who have already been in consultation with the department officials in its preparation. It will then be submitted to the next convention of that association after which it is hoped it will be ready for submission to the next session of the provincial legislature. As a basis for discussion only, a map has been prepared setting out a plan of consolidation which appears reasonable and equitable to the departmental officials, but this map will, of course, be subject to adjustment, both as to the number of large units and their boundaries, as a result of further discussion. The new districts would be set up in accordance with certain fundamental principles, more or less as follows: Grouping of localities having a common interest, and being of the same general agricultural and geographical classification as far as possible.

(Continued on page 4)

very interesting game and the local team came through in a very capable manner easily defeating the visitors.

Donations to the 1932 School Fair

The School Fair Committee have received the promise of the following donations. The list is still and any further donations from persons interested in this worthwhile undertaking will be gratefully received by the Committee.

Keep Flowering

Jerry Marsh told old man Bates that flowers quit blooming when they go to seed. And it didn't take the old man long to see the point. Yet seediness is a curse to the human race. Oh, yes, seeds are necessary that this old planet may be bathed in eternal youth. But man gone to seed is like a flower gone to seed, good for planting purposes only. Seed time may well be grave time and may one not precede the other.

Mith all the various disadvantages which modern flapperism has brought—and we have men flappers, let us not forget—there is, at least, the resistance against one form of seediness. For whatever we hear about the good old times we may be pretty sure that the petals are beginning to fall and it will soon be all off. But to even keep up with the times is not enough. The best flowers grow in the sunshine of the days to be. As Allan told us, "We may not have as much to live ON but just as much to live FOR."

Methods as well as our outlook become seedy. The way our grandmothers and grandfathers did things will not work today. A very few years ago many parts of Alberta were asking for railways and there was scarcely a provincial election but each party presented a railway policy and the one in power always sent out surveyors just before election. But the trucks today are playing havoc with the railways and although we do not see what the outcome will be yet we feel no deep concern. This old world has made it diurnal revolutions pretty regular for the past millenniums and its inhabitants have more reason than any generation which preceded us to believe that satisfactory adjustments have been made.

To keep plucking the flowers is to keep them coming. And we have every reason to display our bouquets. If George Foster could master French after he was seventy years of age, then there's very little excuse for any of the rest of us going to seed.

UNUS SOLUS

Namaka—H. Dankwerth who farms in the Craigantler district south of Standard, has a novel idea for planting potatoes. On a three furrow tractor plow he has had a platform built on which a man sits with potatoes with a thin shoot like a stove pipe. Just in front of the middle plow he drops the potatoes.

By taking low gear it is possible to drive slow enough that a stand equal to an expensive planter is secured and two men can plant five acres a day.

Tuberculosis Causes
Tuberculosis

When anyone is told by his doctor, that he has tuberculosis that person and his friends naturally wonder where he got the disease. We should all know where tuberculosis comes from because when we know the source of a disease and its manner of spread, we should be able to control that disease to a considerable extent.

The cause of tuberculosis is a germ known as tubercle bacillus. Tuberculosis cannot occur unless this germ is present. There are conditions such as overcrowding which favour the spread of the germ from the sick to the well. There are conditions of the body, such as overwork and fatigue, which give the germ a better chance to cause disease.

None of the conditions which favour the germ can in themselves cause the disease, the germ is the one and only cause. This leads us then to consider where the germ comes from and how it is spread.

The tubercle bacillus does not as far as we know, live in nature outside of the human or animal body. This means that the germs come from human beings or animals suffering from tuberculosis. The transfer must be fairly direct because sunlight and drying destroy the germs fairly quickly once they are outside the body.

The important point to understand is that tuberculosis is spread by these who have the disease, whether they know they have the disease or not. This means that tuberculosis causes tuberculosis.

Children suffer from a form of tuberculosis which they contract from the use of raw milk coming from tuberculous cows. This form of the disease can be and is put an end to just as soon as milk is pasteurized because the process of pasteurization kills the tubercle bacillus.

Most cases of human tuberculosis get the disease from other tuberculosis humans. Tremendous numbers of germs leave the body in the sputum of those suffering from active tuberculosis. It is the transfer of this sputum, laden with the germs of tuberculosis, which accounts for the spread of the disease.

The transfer may be direct as

in kissing or by coughs, sneezes or loud talking. It may be indirect as in the use of common eating and drinking utensils. In one way or another the sputum of the case reaches the mouth of a healthy person. The more frequent and the more intimate the exposure, the greater the chance of spread and so the spread commonly occurs in the family.

The case who has learned to take the necessary care to prevent the spread of his sputum is not a danger to others. It is the ignorant or careless case that is responsible for the spread of most of the disease. Tuberculosis causes tuberculosis—every new case comes from a previous one.

School Notes

"Ho Hum, Lazy Weather."

Yes Sir, that's just what it is, and the time is almost here when we can do something about it, sleep in, in the morning for instance.

The holidays are here and instead of the song "Blue Again"

which we sang for the past ten months, we'll sing a new song and change our tune to "Happy Days are Here Again."

She was billed as one of a Trio Act and walked across the stage carrying two dumb bells.

Merchant: Say, young man come in here, and I'll show you the real thing in Men's hose.

High School Shiek: "You're all wet, the real thing doesn't come in Men's hose."

Irene Kelly had the sad misfortune of dislocating her right thumb Wednesday evening, and was to have written the Grade 9 art exam on Thursday afternoon. Though it was a great disappointment not to be able to write the exam, Irene looks on the bright side of it and intends to take the first and second years of art next year.

W. G. Chester, dean of Canadian railroad veterans, has just retired, in Winnipeg, after 25 years in the service of the Canadian Pacific Railway and another 25 with the Brotherhood of Railway Conductors.

Excursions run by the Canadian Pacific Railway between various points in Eastern Canada have met with unequalled success. To date, some 17,000 persons have been carried on visits and holidays, over different week-ends, by this means.

The 1931 census shows 728,244 occupied farms in Canada, or 17,164 more than were shown when the count was taken in 1921. Quebec, Manitoba, Saskatchewan, Alberta and British Columbia are responsible for the increase, with the last-named in the lead.

Ready for Your Fields— —A New John Deere Disk Tiller with a Field Proved HEAVY-DUTY POWER LIFT

A new John Deere Disk Tiller is ready for your fields. Ready with all the field-proved features that made the old John Deere Tiller the choice of many farmers in this region—plus a heavy-duty power lift of the improved, long-lived John Deere type.

With this important improvement the John Deere Disk Tiller is as easy to handle as a tractor plow. Just a tug on the handy trip rope as you drive along sets the lift to work, raising the disks clear of the ground for turning, backing or transporting; another pull drops the disks to working position.

In addition to the time-saving, effort-reducing advantage of the John Deere heavy-duty power lift, you get the thorough work and great strength for which the John Deere Tiller has always been famous.

Stop in next time you are in town and get acquainted with the new John Deere Disk Tiller. We want to show you all of the features that mean satisfaction.

Soft Ball, Mitt and Bat from Hudson's Bay Co., Calgary. 1st prize School Fair Parade.

6 Nugget Shoe Polish Outfits, Nugget Shoe Polish Co., Vancouver to be given as a prize for the spelling contest

L. H. Phillips, pocket knife to boy winning most points

L. H. Phillips, Silver Candlesticks to the girl winning most points

Women's Institute—Board of Trade, Calgary, \$5 special to be used as prizes on essays on "Why One Should Use Alberta Made Goods."

Buffalo Hill News

A remarkable coincidence occurred last week on the farm of Hirst Goldthorpe. One of his workmen, while plowing last year lost his watch in the field and covered it over with soil. While plowing the same field again last week he turned up the watch and though it wasn't running, it needed but few minor repairs.

Mr. Jennijohn's excursion boat, the "Norell", expects to make its maiden voyage on beautiful Sylvan Lake, sometime next week.

The good ship "Norell" is 38 feet in length and weighs about 2 1/2 tons.

It was designed and built entirely by Mr. Jennijohn.

It will be remembered that Mr. Jennijohn also owns another

excursion boat on Sylvan Lake which was in operation last year.

There have been many visitors to the Jennijohn farm to inspect the ship and Arrowwood is becoming famous because of its boat-builder.

While siphoning gasoline from a drum, John Christie was severely burned about the arms.

He was siphoning the gasoline into another container and when he pinched the hose together to shut off the stream, it formed a small spray and shot onto the lighted lantern sitting near by. The flames leaped up immediately and the clothing about his arms took fire.

Four stretches of New Brunswick trout and salmon waters were sold at the Department of Lands and Mines recently for prices totalling \$8,850. These leases for a term of 10 years are on the Restigouche, Kedgwick, Matapedia and Big Seville Rivers and prices paid are the annual rental charges.

Daylight saving time, commencing in Quebec and Ontario provinces May 1, occasioned little confusion on Canadian Pacific travel. Travellers have nowadays learned that the railways remain on standard time and govern themselves accordingly. The railway announced a number of train time alterations prior to the introduction of daylight saving.

From Little Norfolk Island in the South Pacific, one of the smallest units in the British Empire, an excellent sample of beans for exhibition at the World's Grain Exhibition and Conference to be held at Regina July 1933, has just arrived. Norfolk Island is the scene of the punishment of the mutineers of the "Bounty" in 1856 but it has long ago changed from a penal to a prosperous settlement. (841)

Happenings In and Around Arrowwood

The C.P.R. is advertising tempting rates for the Dominion Day holiday season.

Mr. W. S. Benjamin who has been visiting his daughter Mrs. C. G. Taylor, left on Saturday.

FOR SALE—1 cow, just freshened; 1 cow to freshen soon, also 3 steers. Galen Mishler.

The B.Y.P.D. are holding a Home Cooking Sale in the L. F. Chrestenson's store on Saturday, June 25th.

Mrs. A. Robson of Lethbridge is visiting with Mr. and Mrs. R. N. Moir.

Mr. and Mrs. A. C. Little of Stavely, spent the week end at the home of the latter's brother Mr. Frank Johnston.

The appearance of the Bank of Nova Scotia, is being greatly improved by a fresh coat of paint.

T. Kelly and T. Barr shipped a carload of hogs to Burns of Calgary via the Can. Pacific Railway.

Mr. and Mrs. Galen Mishler of Oregon, are here on a two-weeks' visit with Mrs. Mishler's parents, Mr. and Mrs. L. H. Irwin.

Clarence Brubaker, who is a school teacher in California, is spending his holidays with his parents, the Rev. and Mrs. J. H. Brubaker.

Born—At Mrs. Mackie's Nursing Home, Arrowwood, to Mr. and Mrs. W. Holton, of Milo, Saturday, June 18th, a daughter.

Mr. and Mrs. Ross Townsend and family, former residents of here, returned to Arrowwood on sports day to renew old acquaintances. While here they were the guests of Mr. and Mrs. G. G. Smith and returned to their home at Stavely on Sunday.

The Arrowwood ball-tossers swung into action Wednesday evening last against Carleton and were victorious 12-2. The local boys had a big day with the bat and consistent hitting won the game. A full account of the game will appear in next week's issue.

To Amalgamate Municipalities

(Continued from page 1)

Maintenance of the municipal boundaries along township and range lines save where natural boundaries such as rivers might more advantageously be used.

Existence of sufficient population and assessable property so that each unit could function economically.

Consideration of the accessibility of the administrative centre.

Governments of the units would be much the same as the government of the present municipal districts.

There would be a council of six or eight electors from six or eight wards or electoral divisions established in the enlarged municipal area, with the possible chance of having the reeve or chairman of council elected at large, rather than by appointment from the membership of the council as at present.

Premier Brownlee, in discussing the new plan, points out that the development is a logical one, in view not only of the urgent necessity for reducing the general cost of government wherever justified, but also in view of the fact that with the vastly improved facilities of transportation and communication of the present day, enlarged areas are in reality more easily administered than were the smaller units under the conditions which existed when the present system was created.

One of the great benefits of the scheme would be the large economy in the cost of administration, both provincial and municipal, already referred to. Other advantages of the plan would be:

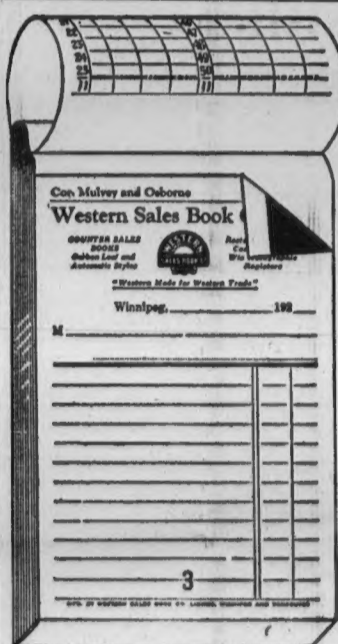

A greater equalization of the tax burden.

A more uniform and more equitable assessment of the lands in the area, since the judgment of the assessor would be applied over a very much larger area.

More uniform school levies, and a saving in the administrative costs of education.

A more co-ordinated system of road-building, the enlargement of the municipal areas making it possible to bring the roads into alignment with those of other districts and with the general provincial highway plan.

The plan, if adopted, would present, also, the opportunity for a review of the whole field of taxation as between the municipalities and the government. The possibility is suggested that the provincial government would abandon the field of real property taxation, leaving that to the jurisdiction of municipal councils, urban as well as rural.

Real Support

Sports Day last Saturday is another indication that whenever Arrowwood puts on anything, the community supports it practically to a man—another indication that the business men should be up and doing, to make Arrowwood the leading center of this district

Firestone Wins Again

History again repeats itself when the winning car, driven by Fred Fame was flashed the checkered flag at the Indianapolis Motor Speedway, riding on Firestone tires.

The story of the Indianapolis Speed Classic reads like a fairy tale. No racing driver has won this event twice in succession, but for 13 consecutive times this race has been won on Firestones. Of the first ten winners who placed for money, not a single one was riding on any other brand of tires but Firestones.

Why do these men of iron nerve, driving, swerving, drifting and skidding depend on Firestones to save their necks. There's a secret and a reason

Let us tell you about it.

① Father; "Well Willie, I received a note from your teacher to-day."

Willie; "Is that so pop? Give me a quarter and I won't breathe a word about it to mother."

② The harvest season is approaching us and the present conditions point toward a fair crop to be handled. You will be needing repairs, canvases, twine or maybe a new binder.

We will be only too glad to wait upon your requirements and this season will still find us handling that famous Holland Brand binder twine at more than two cents reduction in last years price. Twine this season will be cheaper than it has been for fifteen years.
